

# REAR LIGHTING Y HARNESS

(2014-Up Touring Models ONLY)

## TIPS

1. Remove seat and disconnect the negative battery cable.
2. Start by removing the seat and locate the rear fender harness
3. Disconnect the main bike harness from the rear fender harness and simply plug in the Bagger Nation Rear Lighting Y Harness between the main and rear fender harness, be sure to route the harness towards the Tour Pak or supplemental lighting you are wiring in. If you are wiring in supplemental taillights Bagger Nation recommends using our Bagger Lighting Install Kit (BLIK) cut to length, crimp terminals & install connector for a secure connection!
4. Finally connect your newly installed lighting or Tour Pak. Reattach your negative battery cable. Test to make sure all light operate correctly then securely route your wiring.

**Bagger Nation recommends that if you are not comfortable modifying your lighting that it should be installed by a motorcycle technician or reputable shop.**
