

Paul Yaffe's Bagger Nation

7" Never Night Headlight Installation

Story by **Jason Mook** – Photos by **Mela Cosme**

The headlight on your Bagger is a safety feature that not only gives you visibility at night to see where you are heading but it also increases your visibility to be seen by other drivers. Lighting technology has significantly advanced in the last couple of years, which translates into increased safety for everyone on the road. Brighter is better, but there is really much more to it than that. The quality of the lighting emitted from your Bagger's headlight, along with the area it lights up, are important factors as well. Bagger Nation has teamed up with Vision X to offer the new Never Night LED Headlight. Made with a polycarbonate shatterproof lens, the Bagger Nation Never Night LED Headlight is a documented 60% brighter than factory lighting. The light spill is twice as wide and illuminates 400% farther than stock. Bagger Nation carries a Never Night LED Headlight for every model requiring a 7" headlight, as well as 5.75" for Road Glide Models. Difficulty Level: 1/5 **Estimated Time to Complete:** 0.5 hours

PRODUCT

The Bagger Nation 7" Never Night Headlight in Black, with adaptor harness for '14 & later FLH models.

BEFORE

The 2014 FLHX with stock headlight from the factory.

Tools & Supplies Needed

- *Phillips Screwdriver*
- *Fender Cover*
- *Dielectric Grease*

1 After installing a fender cover to prevent damage, use a Phillips screwdriver to remove the single screw at the bottom of the trim ring.

2 Rotate the trim ring counter-clockwise and remove from the headlight.

3 Use a Phillips screwdriver to remove the screws for the retaining ring of the headlight.

4 Remove the headlight from the fairing. When accessible, disconnect the wiring connectors from the back of the headlight.

5 Apply a small amount of dielectric grease to the stock connectors, as well as the connectors on the Bagger Nation wiring adapter.

PAUL YAFFE'S BAGGER NATION

7" Never Night Headlight Installation

Plug the included adapter harness into the stock wiring.

Plug the headlight into the single connector of the adapter harness.

Position the Never Night Headlight in the stock location.

Reinstall the retaining ring with stock hardware.

After positioning the trim ring, use a Phillips screwdriver to install the screw at the 6 o'clock position.
