

Bitchen Road Glide Turn Signal Eliminators

Thank you for choosing Paul Yaffe Originals and Bagger Nation products. The following install tips should make the installation of your new Turn Signal Eliminators simple and easy. If you are not familiar with basic service procedures on your Road Glide (such as outer fairing removal) please refer to a Harley Davidson service manual for your year / model bike.

1) Remove outer fairing and turn signals. Retain the (4) flat washers from turn signal removal. Reinstall your outer fairing.

Fig 2

Fig 3

2) Your TSE kit has new studs included. You will use the long or the short ones, depending on your model. Use Loctite when installing the studs into the TSE's **CAUTION: DO NOT OVERTORQUE THE STUDS!**

Note: The TSE's are marked right and left. Please install them accordingly. Right side is your air cleaner side. **(See Fig # 4)**

3) Now slide the TSE into the turn signal hole and using the (4) flat washers retained in step #1 and the (4) nuts provided secure the right and left TSE's in place...Use blue Loctite on the nuts. **(See Fig # 5 / 6)**
